Load Securement System
Allegheny’s Non-Metallic Heavy-Duty Woven Polyester Strapping delivers high performance along with ease of use and safety. Together, they form a reliable high-strength load securement system for truck, rail and intermodal shipments. This product exceeds the required break strength and joint efficiency standards set by the Association of American Railroads (AAR).

AAR Approved
Allegheny’s Non-Metallic Heavy-Duty Woven Polyester Strapping is approved by the AAR for use in securement methods in closed cars, trailers and containers.

Highway
Allegheny’s Non-Metallic Heavy Duty Woven Polyester Strapping has natural shock absorption, providing the ability to move with a dynamic load without breaking.
